Foreword

This report provides national, State, and regional information on numbers of recipients and amounts of medical vendor payments made in their behalf under provisions of Title XIX of the Social Security Act (Medicaid) for the period July 1, 1973 through June 30, 1974. The data in the report were derived from Form SRS-NCSS-2082, Statistical Report on Medical Care: Recipients, Payments, Services. State agencies administering approved Title XIX programs were responsible for completing report forms and submitting them to the National Center for Social Statistics.

Previous reports in this series (B-4) were published for calendar years 1968-70 and fiscal years 1972-73.

Acknowledgment

This report was prepared by the Medical Statistics Branch, National Center for Social Statistics. Computer processing and data preparation were provided by the Applications Support Branch of the Division of Data Processing.

HIGHLIGHTS

A total of 22 million persons received services under Medicaid in fiscal year 1974.

Medical vendor payments totalled \$10 billion, and the total expenditures for the program of \$10.5 billion amounted to \$49.56 per person in the Nation - Chart I.

Nearly 17 million Medicaid recipients also received maintenance assistance in the form of money payments. However, Medicaid expenditures in their behalf of \$5.6 billion were substantially less than the recipient proportion. Thus, the average amount expended for nonmoney payment Medicaid recipients during the year was more than twice as great - Table A.

There were 10 million children, 5 million adults in families and 4 million persons aged 65 and over served. However, payments made on behalf of the aged totalled \$4 billion and only \$2 billion were expended for medical services for children - Chart II.

A total of \$7 billion was expended for inpatient services: hospitals (\$3 billion), skilled nursing home (\$2 billion), and intermediate care facilities (\$2 billion). Sixty-nine percent of payments were made for inpatient services - Chart III.

More than 15 million persons received physicians' services and more than 14 million received prescribed drugs. Fewer than one million persons received services in any of the long-term care facilities and recipients of general hospital services numbered 3.4 million - Table B.

The proportions of payments by type of service varied among eligibility categories. For the aged, the largest proportion of payments was for long-term care services (mental hospitals, skilled nursing home, and intermediate care facilities) with less than 10 percent expended for general hospital services. Among other categories, the bulk of expenditures was for general hospital inpatient services. Physicians' services accounted for nearly one-fourth of payments on behalf of children and adults in families. Among the blind and disabled, the combined expenditures for other inpatient services was greater than that for general hospital services - Chart IV.

LIMITATIONS OF THE DATA

Although, it is felt that the following limitations do not materially impact on National conclusions drawn from the data, State by State comparisons and other uses may be significantly affected.

Colorado, New York, Guam, and Rhode Island did not submit reports for fiscal year 1974. For Colorado, New York and Rhode Island, total recipient estimates are included in the tabulations and payment data by type of service and basis of eligibility were derived from monthly data collected on report form SRS-NCSS-120. Payment data collected on the monthly reports are additive over the twelve month period, however recipient counts are not additive because the annual report provides for an unduplicated count and recipients can be counted several times on a monthly basis. Thus, recipient estimates for New York and Rhode Island were developed by the National Center for Social Statistics by 'aging' data contained in previously submitted annual reports based on changes in average monthly numbers of recipients between the two annual time periods. Colorado did not consistently report recipient data on a monthly basis during the year, thus their last submitted annual report was 'aged' based on monthly public assistance recipient counts. This procedure produced a decrease in recipients from 1973 for the State, however the decrease is consistent with the one month of Medicaid recipient counts reported during the fiscal year.

In addition to the nonreporting States, Massachusetts submitted an incomplete report showing payment data only, which was judged unacceptable for publication purposes. Massachusetts has not submitted a reliable previous annual report and did not report recipients on a monthly basis. The recipient counts for that State are based on average payments for reporting States with the exception of Puerto Rico and the Virgin Islands, whose programs vary significantly. Thus, Massachusetts' recipient counts are artificial. They are designed to have no impact on the analysis of the reported data. Pennsylvania was able to report recipient counts for each type of service but was unable to provide an unduplicated count of the total number of recipients. The State's detailed recipient counts appeared to be somewhat overstated particularly for prescribed drugs and physicians' services. The unduplicated total number of recipients by basis of eligibility and maintenance assistance status for Pennsylvania represents the greater of the counts for either of the two aforementioned services. Thus, the recipient count of 1.5 million represents the minimum possible number based on data submitted by the State. The recipient counts for Pennsylvania are considered unreliable. New Hampshire was unable to unduplicate recipients between two half-years due to systems conversion.

In addition, some States reported problems in unduplicating recipient counts for the full fiscal year due to SSI conversion which occurred at mid-year, i.e., the formerly State administered adult welfare programs for the aged, blind and disabled became Federally administered in January, 1974. California reported such duplication among the adult categories and Alabama's adult recipients are clearly overstated. Data for North Carolina were estimated by the State.

Validation efforts by the National Center for Social Statistics include comparing State's payment data cumulated from reports submitted on Form SRS-NCSS 120 with those submitted on the annual report. Exact agreement between the two sets of reports is not expected because retroactive cost adjustments are included on the monthly reports and not the annual, payments made by health maintenance organizations are required on the annual report but not the monthly, and sampling is allowed for the annual report but discouraged for monthly data. Seven States showed variances in excess of five percent between the cumulated monthly reports and the annual. They were Illinois, Louisiana, Maine, North Carolina, Pennsylvania, Washington, and Wyoming.

Although with the use of computers, it is basically as simple to prepare complete reports for Form SRS-NCSS-2082, the National Center recommends and encourages the use of sampling when it simplifies report preparation. The sample frame is the universe of recipients receiving services during the year. Case number endings usually serve as the basis for selecting a systematic random sample. States using sampling for the 1974 report were California (5%), Georgia (4.8%), Illinois (10%), Minnesota (used a variable stratified sampling approach), North Carolina (10%), Pennsylvania (5%), and Puerto Rico (varying sample size of approximately 2.69%), Washington (5%), and Wyoming (16.7%). Sample procedures have not been reviewed in all cases and some of the data reported may be in variance due to a misunderstanding of the sampling frame, i.e., there is some indication in one instance that claims may have been used as the universe from which a percentage sample was drawn.

In some States, two or more types of services may be grouped together under one class. West Virginia, North Carolina, and Missouri included intermediate care facility services under skilled nursing homes. For Kansas; clinic, laboratory and radiological services are included in other care. There are other instances where such groupings have occurred.

Small differences may appear in National totals as well as State totals due to rounding of dollar amounts.

Arizona has no Title XIX program and thus does not appear in the tabulations.

Payments and estimated recipient counts for nonreporting States are included in Tables 1-7, 17 and 18, only.

MEDICAID IN 1974

During fiscal year 1974, approximately 22 million persons (10.4 percent of the civilian population) had medical vendor payments totalling \$10 billion dollars made in their behalf under Title XIX of the Social Security Act (Medicaid). As shown in Chart I, the total U.S. per capita expenditure for the program amounted to \$49.56, an increase of 12.5 percent from fiscal year 1973. Among States, per capita payments ranged from a low of \$12.45 in Wyoming to a high of \$126.88 in New York. Expenditures for New York (\$2.4 billion) and California (\$1.3 billion) alone accounted for nearly forty percent of the total. The Medicaid program aided a low of 2.8 percent of the population in Alaska to a high of more than sixty percent of the population in Puerto Rico.

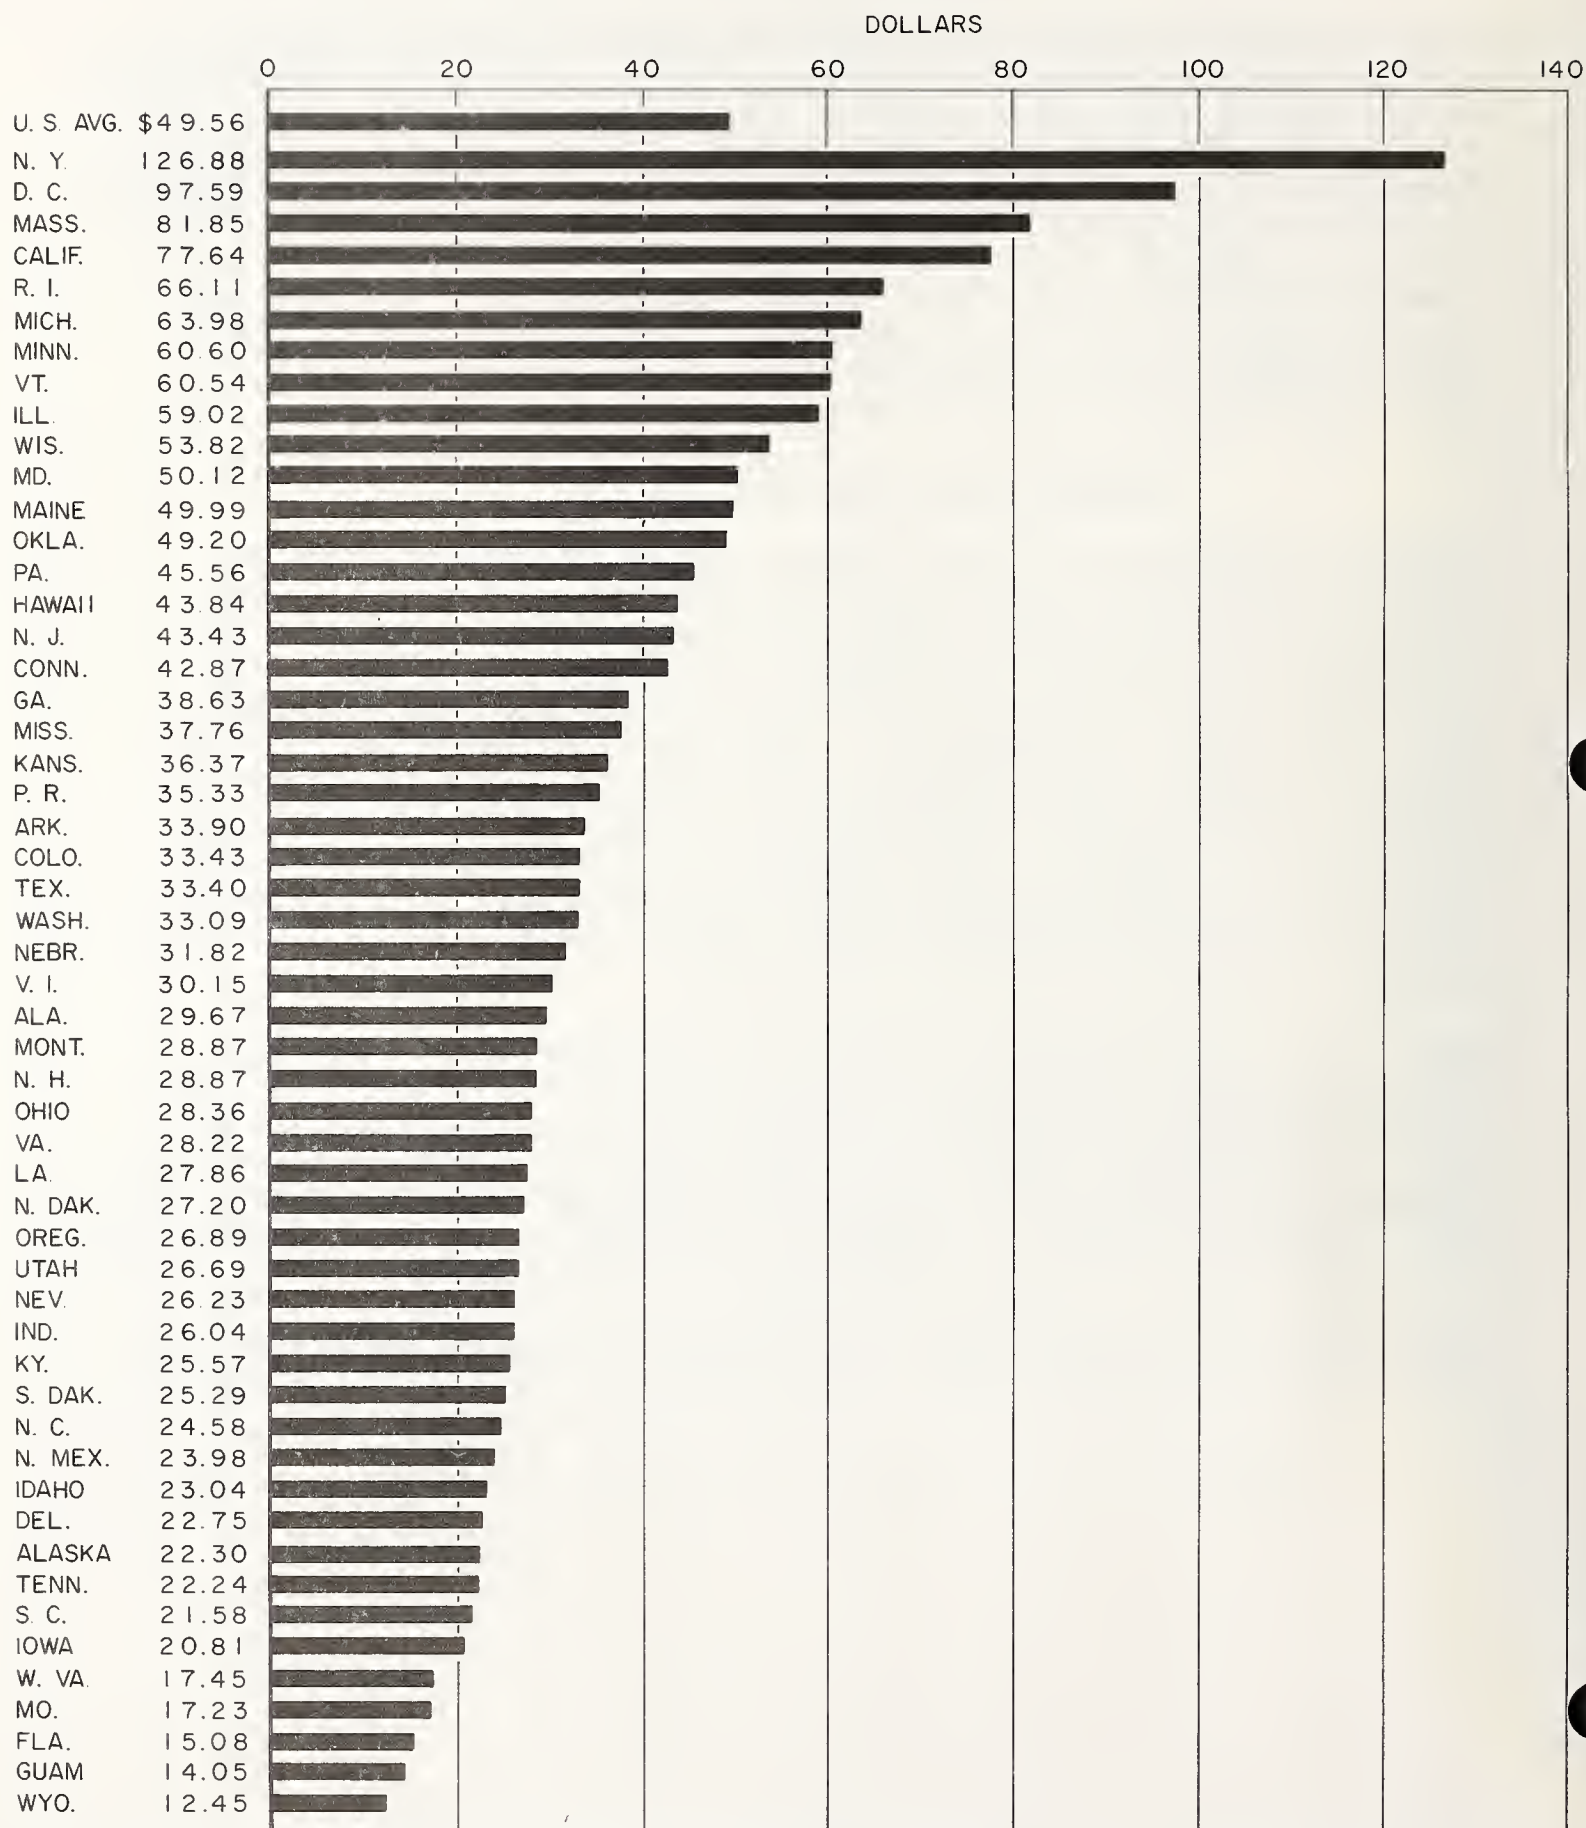

Composition of the 1974 Caseload

Dependent children under 21 and other Title XIX recipients under 21 comprised nearly half (45.9 percent) of the Medicaid caseload. The more than 10 million persons under 21 served under the program in 1974 represented 12.5 percent of the Nation's children. There were a few additional persons under 21 served by the program who were classified under other bases of eligibility. During 1974, adults in families with dependent children represented the second largest proportion of the caseload (20.5 percent). Persons 65 years of age and older made up an additional 17.3 percent of the recipients. Due to limitations of the reported data, changes in the caseload from 1973 cannot be accurately portrayed. However, there were significant increases for all eligibility categories except other Title XIX recipients.

Three out of four Medicaid recipients also received money payments for their maintenance needs under the programs of Aid to Families with Dependent Children, Supplemental Security Income or Aid to the Blind, Aid to the Permanently and Totally Disabled and Old Age Assistance. The nonmoney payment group of recipients was comprised of fewer children (37.6 percent) and adults in families (10.9 percent) and more aged persons (23 percent) than the money payment segment of the caseload.

Women made up nearly two-thirds (64.5 percent) of the Medicaid caseload.

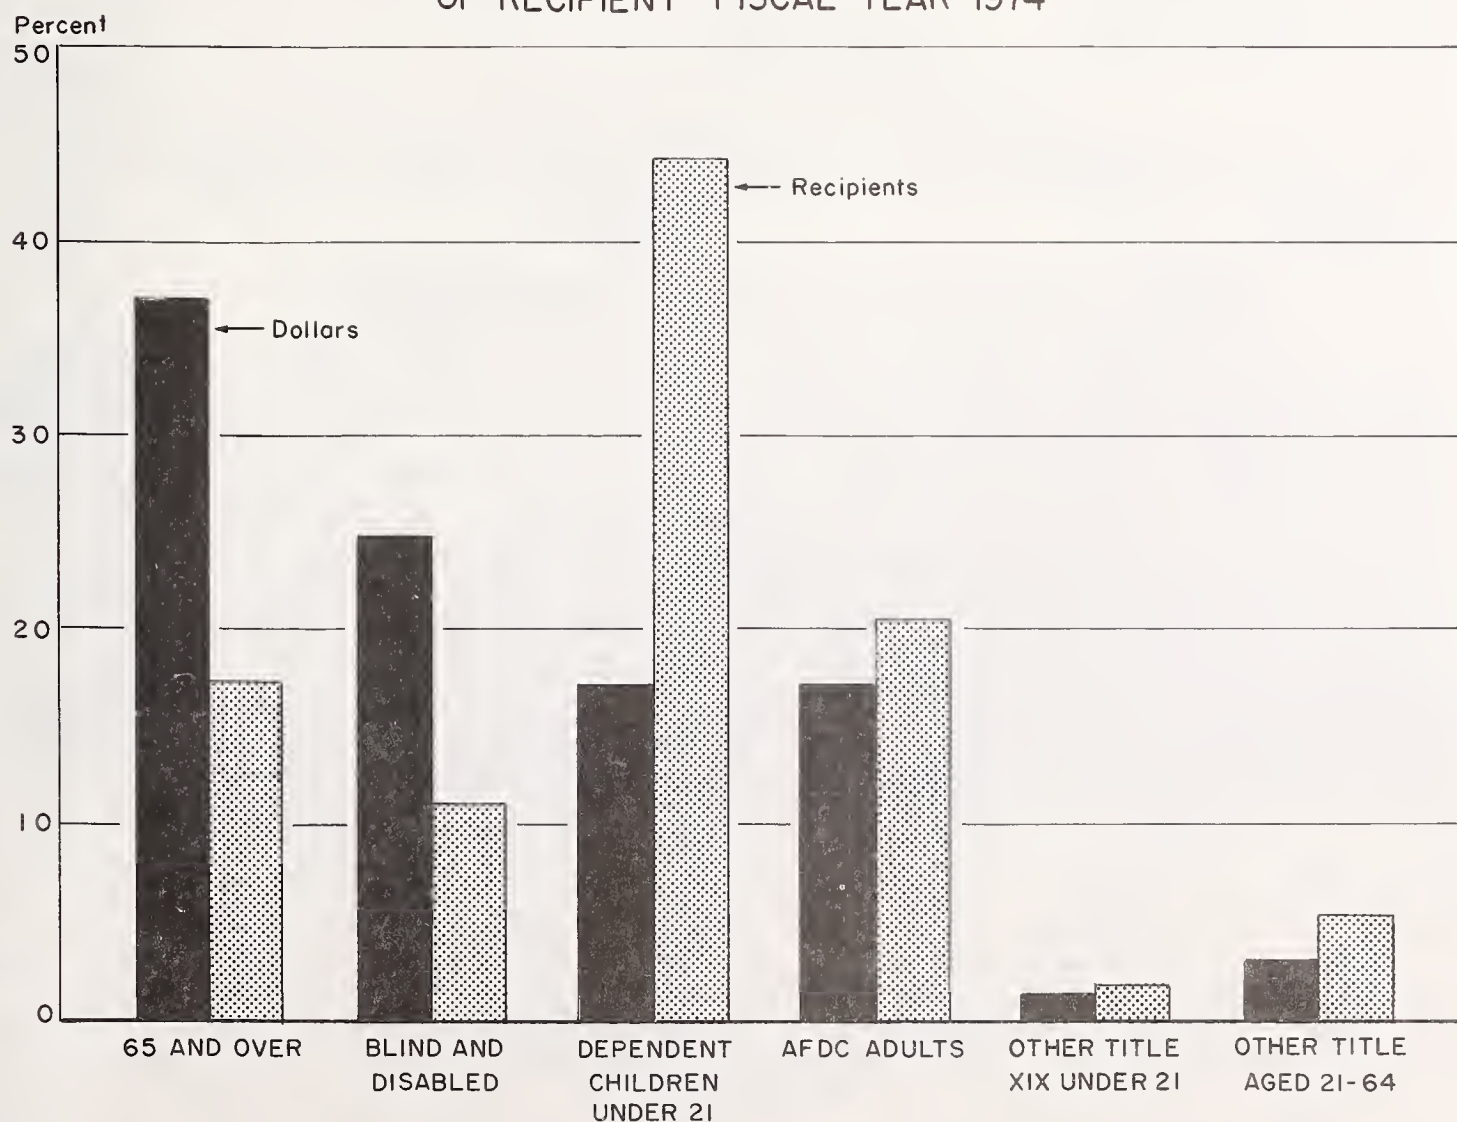

CHART I. EXPENDITURES PER INHABITANT FOR MEDICAID-FISCAL YEAR 1974

Amounts of Payments by Groups of Persons Served

As shown in Chart II, the distribution of payments did not follow the proportional pattern of recipients. Payments made on behalf of persons 65 years of age or older and the disabled amounted to 61 percent of the Medicaid dollars spent. Medicaid payments for the aged consumed 37 percent of the total even though extensive medical coverage is provided to this group through Title XVIII of the Social Security Act (Medicare). Dependent children under 21 who constituted the highest proportion of recipients (44.2 percent) had only 17 percent of the total payments made in their behalf.

CHART II.
DISTRIBUTION OF RECIPIENTS AND PAYMENTS BY BASIS OF ELIGIBILITY
OF RECIPIENT FISCAL YEAR 1974

About forty-four percent of payments were made on behalf of persons who were not also recipients of money payments. Thus, as shown in Table A, payments for nonmoney payment recipients were higher than those for persons who also required money payments for the maintenance needs. Among the group of nonmoney payment recipients are persons who are under long-term inpatient care and the 'medically needy' who seek help in paying large medical bills. These circumstances tend to inflate the medical payments for the nonmoney payment group of recipients.

Table A.--Average Medicaid Payments Per Recipient by Basis of Eligibility and Maintenance Assistance Status, Fiscal Year 1974

Eligibility categories	<u>Total</u>	<u>Money Payments were</u>	
		<u>Authorized</u>	<u>Not authorized</u>
Total.....	\$454	\$340	\$805
Aged 65 and over.....	970	459	2,028
Blindness.....	586	529	760
Permanent and total disability..	1,048	857	1,928
Dependent children under 21.....	174	165	219
Adults in families.....	378	369	438
All other under 21.....	329	#	354
All other aged 21-64.....	257	#	252

#In general, these recipients are essential persons and should have been categorized according to the eligibility factor of the money payment recipient.

Payments and Recipients by Type of Medical Service

While seventy percent of Medicaid recipients received physicians' services and nearly two-thirds had drug prescriptions filled, payments for these services constituted but 11 and 7 percent of the total, respectively. By far, the bulk of Medicaid payments was made for inpatient services (69 percent). This proportion does, however, represent a slight decrease from 1973. The largest share of payments continued to be made for general hospital inpatient services (29 percent); even though this proportion also showed a decline from the previous year's data. Fifteen percent of the Medicaid caseload received general hospital inpatient services. Combined long-term care facilities (mental hospitals, skilled nursing and intermediate care facilities) accounted for forty percent of the total payments. Persons receiving these services represented at most 6.4 percent of the total.

Utilization of long-term care services was significant only for the aged and disabled categories of recipients, as shown in Table B. The higher proportion of payments for long-term care accounted for the differences in average medical payments between money and nonmoney payment recipients. Thus, if long-term care payments were excluded from the vendor payments for the two maintenance assistance groups, average payments for money payment recipients would be higher by a ratio of 3 to 1, which corresponds to the recipient proportions.

CHART III.
DISTRIBUTION OF MEDICAID DOLLARS BY TYPE OF SERVICE
FISCAL YEAR 1974

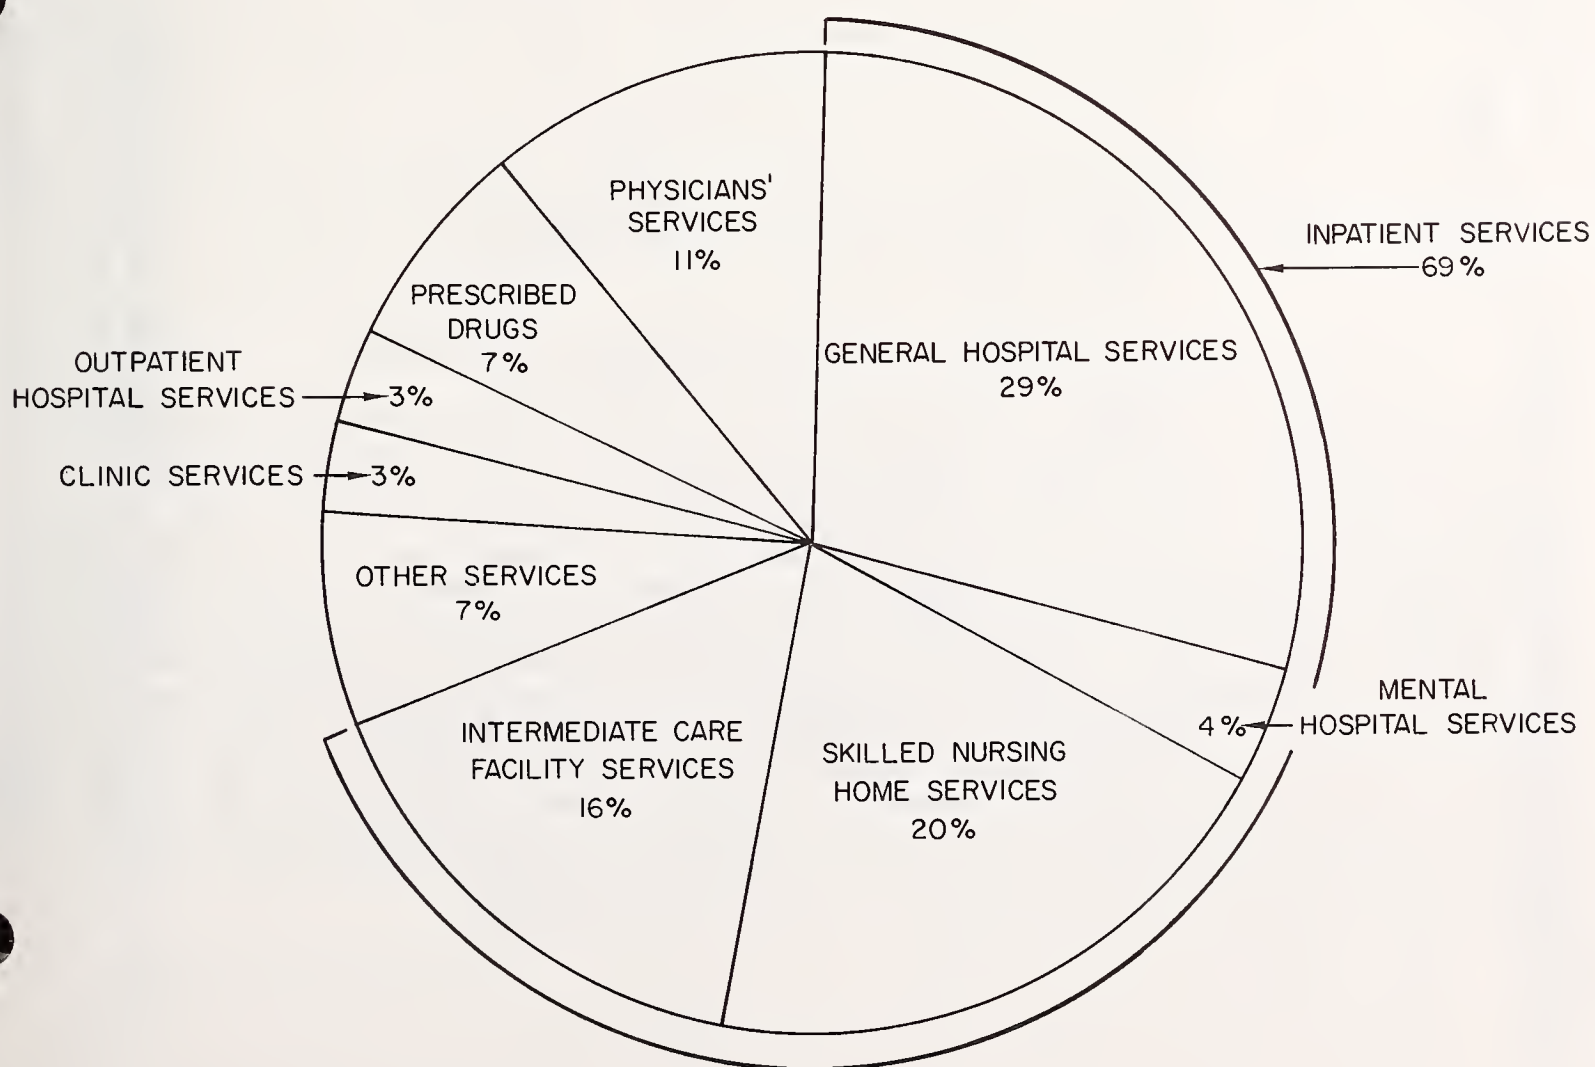

Table B.--Proportion of Recipients by Eligibility Category Who Received
Selected Types of Services, Fiscal Year 1974

1/ Total includes estimated data for missing States; detailed eligibility categories do not.

Note: Columns add to more than 100 percent because recipients may have received several types of service during the year.

Payments by Type of Service and Basis of Eligibility

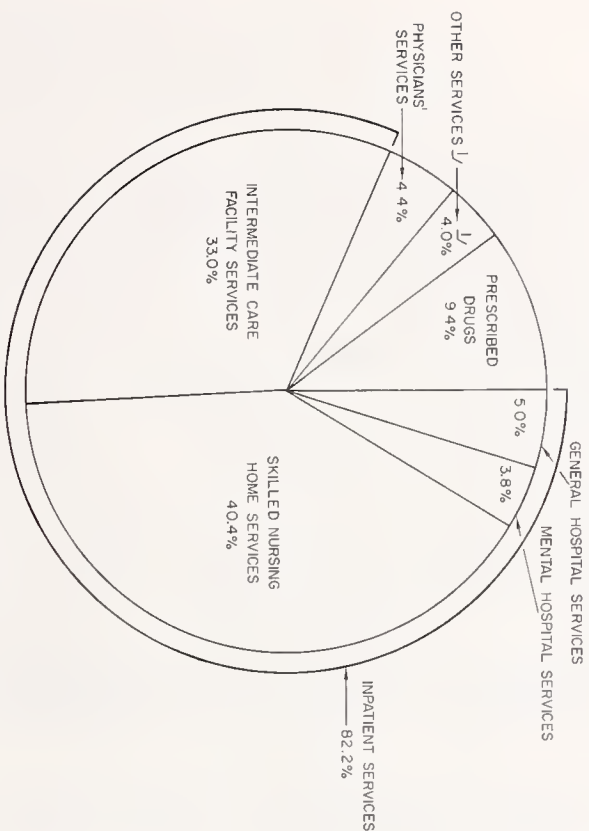

There was variance, as shown in Chart IV, in the distribution of payments for the various eligibility categories of recipients. Inpatient services consumed the bulk of medical payments for the aged, blind, and disabled, but less than half of the payments for children and adults in families. General hospital services which accounted for from 34.1 to 47.5 percent of payments for other categories of recipients amounted to only five percent of payments for the aged. As shown in Table B, utilization of general hospital services under Medicaid was quite high for the aged, but Medicare (Title XVIII) covers most of the cost of short-term hospitalization for these recipients with Medicaid usually paying only a small portion. The greatest expenditures for the aged were for long-term care services. Expenditures for physicians' services were quite prominent for both children under 21 and adults in families, accounting for nearly one-fourth of their payments. The data in Chart IV may be somewhat distorted due to the lack of New York data, specifically with respect to clinics. Payments for clinic services are unusually large for that State and account for more than nine percent of its Medicaid payments.

CHART IV.

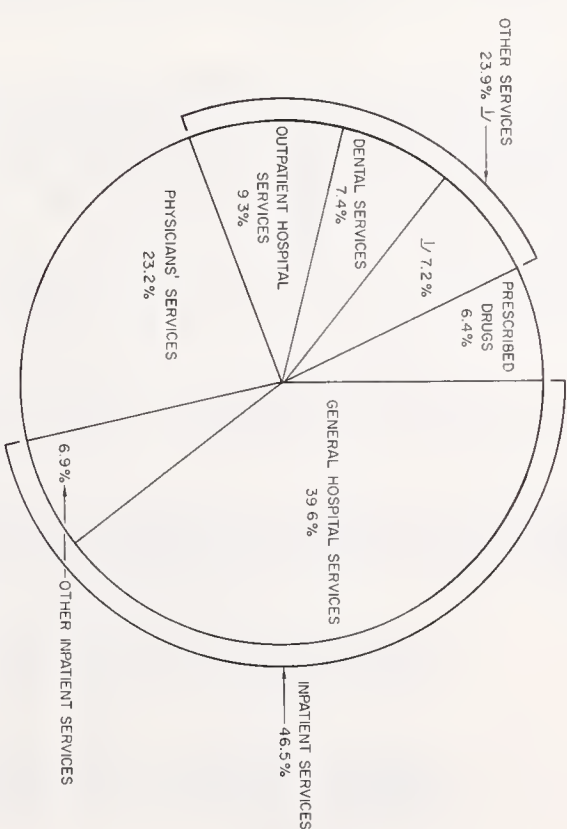

11

PAYMENTS BY TYPE OF MEDICAL SERVICES BY ELIGIBILITY CATEGORY OF RECIPIENT FISCAL YEAR 1974

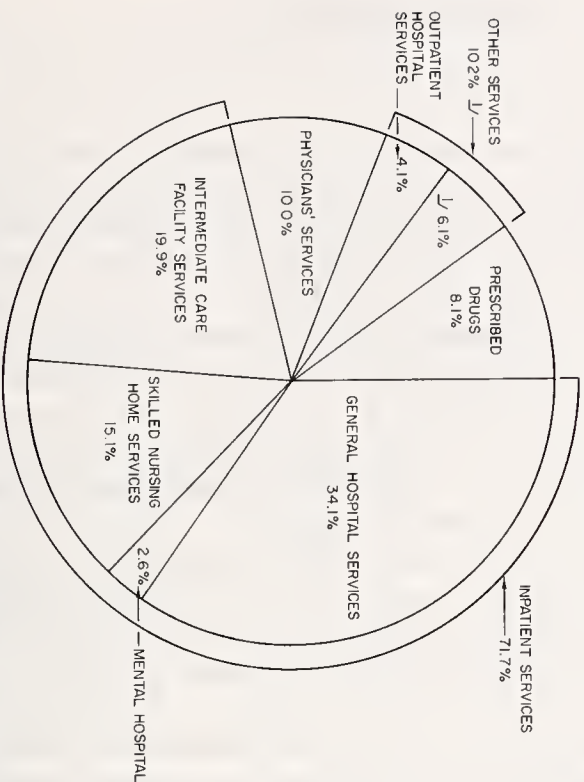

AGE 65 AND OVER, 37.0% OF TOTAL PAYMENTS

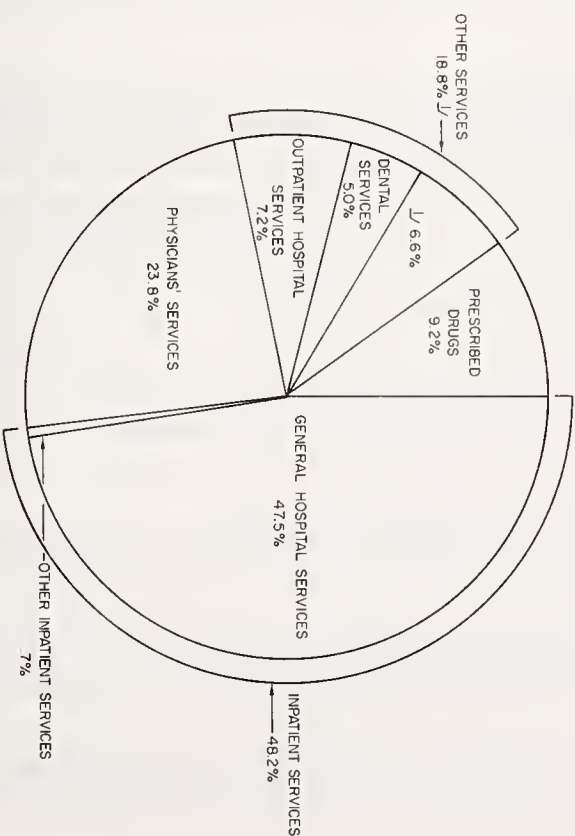

CHILDREN UNDER 21 YEARS OF AGE, 18.2% OF TOTAL PAYMENTS

BLIND AND DISABLED, 24.7% OF TOTAL PAYMENTS

ADULTS IN FAMILIES WITH DEPENDENT CHILDREN, 17.1% OF TOTAL PAYMENTS

✓ TOTAL OTHER SERVICES INCLUDES OUTPATIENT HOSPITAL, LABORATORY AND RADIOLOGICAL, DENTAL, CLINIC, HOME HEALTH, OTHER PRACTITIONERS' SERVICES AND OTHER CARE. SERVICES IN THIS GROUP ARE SHOWN SEPARATELY WHERE THEY EXCEED 3% OF THE PAYMENTS.

NOTE: DATA CONTAINED IN THE CHARTS EXCLUDE COLORADO, MASSACHUSETTS, NEW YORK, AND RHODE ISLAND.

DEFINITIONS AND INTERPRETATIONS

Medicaid (Title XIX of the Social Security Act) is an assistance program designed to provide medical assistance to specified groups of needy individuals. Such persons are classified into two main groups according to their maintenance assistance status, (1) those who are authorized to receive money payments for their basic necessities under public assistance programs such as Aid to Families With Dependent Children, and (2) those who are not receiving maintenance assistance payments even though some may, in fact, be eligible. There are four basic eligibility requirements for medical assistance: (1) age 65 and over; (2) blindness; (3) permanent and total disability; and (4) membership in families with dependent children. In addition, some States have exercised the option of including other needy persons who do not fall into any of the above categories. Such recipients are classified as 'Other title XIX' recipients in the accompanying tables. Also, 'essential persons' (usually spouses) may also be eligible for medical care. For money payment recipients, these persons are usually classified according to the same eligibility factors as the recipient spouse.

In tables showing numbers of recipients, a total represents the unduplicated number of persons for whom vendor payments were made for one or more types of care during the year.

Amounts of payments do not include premiums paid for supplementary medical insurance under the Medicare program.

Age groupings on tables showing demographic characteristics of recipients do not necessarily agree with the eligibility criteria based on age. For example, a mother in an AFDC family is considered an adult regardless of age. Similarly, the spouse of a recipient who is 65 years of age or older may receive medical services on the basis of the qualifying spouse's eligibility criterion even though under age 65. Blind and disabled recipients may be any age.

Abbreviated definitions of the types of services for which data are reported are:

Inpatient hospital services - All items of care furnished to an inpatient and covered by the hospital's bill.

General hospital - A hospital maintained primarily for inpatient care of acute illness or injury and for obstetrics or tuberculosis.

Mental hospital - A hospital primarily engaged in providing psychiatric services for the diagnosis and treatment of mentally ill persons.

Skilled nursing home services - All services furnished to inpatients of, and billed for by, a licensed or formally approved nursing home that meets standards required under a title XIX program.

Intermediate care facility services - All services provided by an institution furnishing health-related care and services to individuals who do not require the degree of care provided by hospitals or skilled nursing homes.

Physicians' services - Services provided by an individual licensed under State law to practice medicine or osteopathy. Services covered by hospital bills are not included.

Dental services - Services, including ancillary services, provided by a dentist in the practice of his profession.

Other practitioners' services - Services of licensed practitioners other than physicians and dentists.

Outpatient hospital services - Services furnished to outpatients by a hospital.

Clinic services - Services furnished to outpatients by a facility which is not part of a hospital, but which is organized and operated to provide services to outpatients.

Laboratory and radiological services - Professional and technical laboratory and radiological services provided in an office or similar facility (other than a hospital outpatient department or clinic) or by a qualified laboratory.

Home health services - Services furnished a patient in his home, including: intermittent or part-time nursing service provided by a home health agency, or by a registered professional nurse or licensed practical nurse; medical supplies, equipment, and appliances for use in the home; and services of a home health aide.

Prescribed drugs - Drugs dispensed by a licensed pharmacist on the prescription of a practitioner licensed by law to administer such drugs, and drugs dispensed by a licensed practitioner to his own patients. This item does not include a practitioner's drug charges that are not separable from his other charges, or drugs covered by a hospital's bill.

Other care - Any medical or remedial care not covered by the above included in the State plan and recognized under State law.
